

DHRUVIL PAREKH

Lead QA Engineer | ISTQB Certified

dhruvil.parekh3@gmail.com • +91-8000164009 • [linkedin.com/in/dhruvilparekh](https://www.linkedin.com/in/dhruvilparekh) • Ahmedabad, India

PROFESSIONAL SUMMARY

ISTQB Certified Lead QA Engineer with 9.5+ years of hands-on experience building and executing test strategies across MedTech, Healthcare, Financial Services, E-commerce, Self-Ordering Kiosk, and VR/AR domains. Deep expertise in FDA-regulated medical device validation, full-cycle payment verification, REST/SOAP API testing, SQL database validation, and VR/OS quality assurance. Known for owning quality from strategy through production release — with a track record of zero critical defects, regulatory compliance, and measurable team performance gains.

KEY ACHIEVEMENTS

- Led 20+ major releases across healthcare, financial, and retail sectors with zero critical production incidents
- Reduced regression cycles by 60% through optimized test strategies, risk-based prioritization, and process standardization
- Validated payment workflows across 10+ payment methods at GRUBBRR — achieving zero production payment defects across all client deployments
- Trained and mentored 15+ QA engineers across medical devices, payments, blockchain, and VR/AR platforms
- Improved team efficiency by 31% through structured defect reporting, QA metrics tracking, and cross-functional process improvement

CORE SKILLS & TECHNICAL EXPERTISE

Testing: Manual, Regression, Integration, API, Performance, Security, Payment Validation, Medical Device, VR/OS

Compliance: FDA, HIPAA, Class I & II Medical Devices, HL7, FHIR, 11073 SDC

Methods: Agile Scrum, Waterfall, Risk-Based Testing, BVA, Equivalence Partitioning, Decision Tables

Leadership: Team Leadership, Mentoring, Stakeholder Management, Cross-functional Collaboration, Process Improvement

Tools: JIRA, TestRail, MatrixALM, Postman, Charles Proxy, Chrome DevTools, Confluence

API Testing: REST APIs, SOAP Web Services, JSON, XML, Postman

Database Testing: MySQL, PostgreSQL, SQL Queries, Data Validation

Cloud & Platforms: AWS S3, Kubernetes; Windows, macOS, Linux, Android, iOS, Kiosk, Oculus OS, GearVR

Payments: Verifone, FreedomPay, Clover, NFC, Digital Wallets

Currently Learning: *Playwright (Test Automation)*

PROFESSIONAL EXPERIENCE

Lead QA Engineer — GRUBBRR, Ahmedabad, India

Oct 2024 – Present

Leading provider of self-ordering kiosk solutions for restaurants, retail, stadiums, and entertainment venues.

- Own full-cycle QA for kiosk software, self-ordering apps, POS integrations, digital menu boards, and loyalty systems — ensuring 100% test coverage across client deployments
- Built and executed payment verification framework across 10+ methods (Verifone, FreedomPay, Clover, NFC, Digital Wallets) — zero production payment defects recorded to date
- Conduct REST API testing via Postman covering payment gateway and POS integrations; verify request/response accuracy, error handling, and data flow at every touchpoint
- Run SQL-based database testing to confirm order calculations, transaction records, and backend data integrity across ordering workflows
- Drive defect resolution across development, product, and client teams — triaged and closed 50+ functional and integration defects pre-production
- Mentor and upskill 6 junior QA engineers on system architecture, integration testing practices, and quality standards — boosted team execution efficiency by 20%

Lead QA Engineer — AimDek Technology, Ahmedabad, India

Jan 2024 – Oct 2024

MedTech product company building FDA-regulated health monitoring devices and clinical data exchange platforms.

- Led full QA lifecycle for Class I & II medical devices including Sibel Health wearables — comprehensive verification under FDA 21 CFR and HIPAA compliance
- Designed and ran clinical data workflow tests covering HL7, FHIR, and 11073 SDC standards across device-to-platform integrations
- Performed REST and SOAP API testing for healthcare data exchange; confirmed payload accuracy, authentication, and fault-tolerance across clinical endpoints
- Ran SQL-based database checks to confirm clinical and operational data accuracy across regulated storage layers
- Drove 30% reduction in regulatory defects by implementing structured risk assessments, traceability matrices, and compliance-focused test plans
- Monitored Kubernetes cluster logs for production healthcare applications — identified and resolved incidents proactively, improving system uptime by 15%

Senior Software Engineer — QA — Apexon, Ahmedabad, India

Mar 2021 – Dec 2023

Global technology services company; delivered QA across healthcare IoT devices, financial systems, and blockchain platforms.

- Tested and verified REST/SOAP APIs across 20+ endpoints for health devices, lifestyle apps, and financial platforms — full regression and integration coverage
- Led quality assurance for blockchain platform — verified smart contract execution, token transaction workflows, ledger integrity, and edge-case failure scenarios
- Performed SQL database testing and cloud data sync checks for IoT health devices across multi-tier backend systems
- Delivered 12 consecutive major releases with zero defect leakage across healthcare, financial, and blockchain product lines
- Recognized with the "Bright Spark" award for outstanding quality contributions and consistent high-impact delivery

Senior Quality Assurance Specialist

— CheckTech for Information Technology, Riyadh, Saudi Arabia

Sep 2019 – Mar 2021

IT solutions company delivering Transportation, E-commerce, and F&B digital platforms across the Middle East region.

- Authored and ran 200+ manual test cases for high-traffic platforms serving 500K+ active users — applied BVA, Equivalence Partitioning, and Decision Table techniques throughout
- Performed UI/UX quality checks across 100+ screens and user flows — improvements contributed to a 20% increase in user satisfaction scores
- Boosted team productivity by 31% by introducing structured defect reporting workflows, QA metrics dashboards, and root cause analysis processes
- Led stakeholder management and coordinated offshore QA team of 4 engineers across 8 simultaneous projects in Agile and Waterfall delivery models

Software Tester — Lodestone (acquired by Tech Mahindra), Ahmedabad, India

Jan 2016 – Aug 2019

Software services firm focused on VR/AR platform development and Oculus ecosystem products for global clients.

- Ran comprehensive Oculus OS qualification — covered system UI, firmware upgrades, sensor calibration (head tracking, motion, proximity), connectivity, and permissions across GearVR, Oculus Go, Quest, and Rift
- Owned build sign-off for 50+ VR applications across Master, Release Candidate, HotFix, and Custom build pipelines
- Led performance regression cycles — identified root causes and resolved 200+ critical OS defects, cutting test execution time by 35%
- Certified hardware-software integration and controller firmware compatibility across multiple Oculus device generations

Software Engineer — CHHAVI, Ahmedabad, India

May 2015 – Dec 2015

- Built web application features that improved overall application performance by 15%
- Worked closely with UI/UX designers and stakeholders to deliver interface improvements aligned with product goals
